Mainstreaming Session - Objectives

- Share assessment experiences and lessons learned.

- Explore how assessments can best:
  - meet the "perceived" needs of decision makers.
  - influence decision makers to lead to change.

"Decision makers" = public and/or private sector

= national/sub-national/local

Group discussion on
Strengthening the linkages of ecosystem assessments with needs and expectations of decision makers

Share good examples, lessons learned on:

How can assessment results better match "perceived" needs?

Which groups/stakeholders should be involved?

What methods could be used for analysis of the drivers, trends and trade offs?

- One group per table

- 40 minute discussion

- Plenary sharing and discussion: 20 minutes
